SUMMARY

I'm a results-oriented and detail-driven engineer with a strong programming background and a passion for ensuring software reliability. Currently, I am building web applications using React.js, JavaScript, TailwindCss, HTML/CSS and Firebase. I am committed to delivering high-quality web apps by applying industry best practices using frameworks and libraries. I am seeking opportunities to contribute and enhance my skills and am currently learning AI to make my web apps more interesting.

TECHNICAL SKILLS

Languages: JavaScript, CSS, HTML

Framework: React.js, TailwindCss

Database: Firebase

Developer Tools: Git, Github

EXPERIENCE

Hackathons

I enjoyed working in teams to learn from other people

- Participated in several small hackathons at the college level, as well as a major hackathon organized by TechFest.

Coding Instructor

Taught HTML, CSS and JavaScript to High School Students as a part-time Job

- Taught the basics of HTML/CSS including JavaScript with the easy way of getting started in web development.

PROJECTS

Quiz Web App | Firebase, JavaScript, HTML/CSS

- Built this project that enhanced my skills in dynamic content and user interaction, creating on engaging learning experience. A rewarding coding challenge !
